Zhang, K. *See* Liao, Zhang & Chang

R. Camassa, W. Choi, H. Michallet, P.-O. Rusås & J. K. Sveen	On the realm of validity of strongly nonlinear asymptotic approximations for internal waves	1
D. M. McEligot & H. Eckelmann	Laterally converging duct flows. Part 3. Mean turbulence structure in the viscous layer	25
F. Vega Reyes & F. J. García	Pattern imaging of primary and secondary electrodynamic instabilities	61
F. Gallaire, M. Ruith, E. Meiburg, J.-M. Chomaz & P. Huerre	Spiral vortex breakdown as a global mode	71
A. Chauhan, C. Maldarelli, D. T. Papageorgiou & D. S. Rumschitzki	The absolute instability of an inviscid compound jet	81
S. L. Butler, H. E. Huppert & M. G. Worster	Numerical modelling of convection in a reactive porous medium with a mobile mush–liquid interface	99
S. L. Gavrilyuk & R. Saurel	Estimation of the turbulent energy production across a shock wave	131
D. E. Farrow & G. C. Hocking	A numerical model for withdrawal from a two-layer fluid	141
G. L. Eyink	Multi-scale gradient expansion of the turbulent stress tensor	159
G. L. Eyink	A turbulent constitutive law for the two-dimensional inverse energy cascade	191
D. Vella, P. D. Metcalfe & R. J. Whittaker	Equilibrium conditions for the floating of multiple interfacial objects	215
J. Zhang & I. A. Frigaard	Dispersion effects in the miscible displacement of two fluids in a duct of large aspect ratio	225
M. S. Nigam & A. W. Woods	The influence of buoyancy contrasts on miscible source–sink flows in a porous medium with thermal inertia	253
N. Bremond & E. Villermaux	Atomization by jet impact	273
N. Shahidzadeh-Bonn, S. Rafaï, A. Azouni & D. Bonn	Evaporating droplets	307
G. Gabard & R. J. Astley	Theoretical model for sound radiation from annular jet pipes: far- and near-field solutions	315
A. A. Korobkin & Y.-M. Scolan	Three-dimensional theory of water impact. Part 2. Linearized Wagner problem	343
X. Liao, K. Zhang & Y. Chang	On boundary-layer convection in a rotating fluid layer	375
D. N. Beal, F. S. Hover, M. S. Triantafyllou, J. C. Liao & G. V. Lauder	Passive propulsion in vortex wakes	385
J. Yu	On the instability leading to rip currents due to wave–current interaction	403
D. Tordella & M. Iovieno	Numerical experiments on the intermediate asymptotics of shear-free turbulent transport and diffusion	429
